Job Fair 2015

Jain University - CMS Business School conducted **CMS Job Fair 2015** on 28 February 2015. It was a great initiative by providing platform for the fresh job aspirants across Karnataka.

Organizations were assigned specific areas of the campus where potential job seekers met and interacted with recruiters and explored employment opportunities.

This opportunity was open to undergraduates of engineering, commerce, management and postgraduates of management studies. Colleges across Karnataka were invited and the footfalls exceeded 2000 participants this year.

CMS Job Fair 2015 helped candidates get a foot in the door of their targeted organization. It was a good place to meet prospective employers, connect with HR personnel, and expand their network.

Attending the Job fair was one of the most effective ways for Employers to gain visibility and maximize their recruiting potential. It also helped to maintain a strong visible presence on-campus and interact with students face-to-face. This was an opportunity for Employers to:

- talk to over 2000+ students from all majors in one day
- maintain visibility at one of the nation's top universities
- educate students on their hiring practices, desired skills and recruiting cycles
- recruit for career, internship, and summer positions

The event was an astounding success and it could not have happened without the participation of potential job seekers and 40+ employers. We welcomed 40+ employer partners and a record breaking foot fall of 2000 candidates to the Job Fair. Through aptitude test and initial screening test the skilled candidates were selected by the companies, around 446 students were shortlisted for the further rounds.

Our major recruiting partners:
IBM, ICICI Bank, ICICI Prudential, OLA Cabs, ANZ Bank, Accenture, Go Indigo, Askme.com, Freshersworld.com, CMC Ltd…and many more.

CMS Virtual Job Fair
The good news is that the job fair continues virtually to help recruiters in hiring potential candidates online, also helping the students to apply for their desired job in a single click.
