

Adventure Learning Programme 2015

CMS Business School organized a one day outbound activity at Ramnagara for the new batch of 2015-17 which was spread over 3 days starting 29th to 31st July 2015. During the programme students were encouraged to challenge themselves, pushing their physical and mental boundaries in order to overcome barriers to teamwork and effective action.

The activities were a mixture of adventure sports included rappelling, jumaring and zip crossing, night trekking and creative management learning. It was a fun combination of physical exercise as well as the mind strategies. The activity like every year was filled with fun, learning and memories.
